EDUCATION

John Abbott College | DCS Computer Science Technology | Expected May 2027 | Ste-Anne-de-Bellevue, QC

Courses: Programming, App Dev, Web Dev, Database, Operating Systems, Security, UI/UX, Game Dev, Networking, IT

PROJECTS

Signalist | Full-Stack Web App | Next.js, TypeScript, MongoDB, Inngest September 2026

Architected a full-stack fintech platform with secure authentication, live TradingView chart integrations, and real-time Finnhub-powered stock search. Engineered automated background pipelines using Inngest to generate AI-personalized (Gemini) emails and deliver daily AI-summarized market news digests to users via scheduled cron jobs.

Codescout | CLI Tool | Python, Gemini API August 2026

Built an autonomous coding agent implementing a full agentic loop (function calling, iterative execution) with the Gemini API. Designed four core tools letting the agent inspect, modify, and run code autonomously in a sandboxed environment, with conversation history management enabling multi-step reasoning.

MyChef | Full-Stack Recipe Platform | React, TypeScript, Node.js, PostgreSQL May 2026

Built a full-stack recipe management platform where users create, save, filter and sort recipes, with a React/TypeScript client and a Node.js/TypeScript server. Engineered a custom HTTP router and session-based authentication with role-based access control (user, owner, admin) instead of relying on a web framework, backed by PostgreSQL.

CampusConnect | Desktop App for Club & Event Management | C#, WPF, OOP December 2025

Designed and developed a multi-window C# WPF desktop application to manage student clubs, events, and participant registrations using OOP design principles. Implemented persistent data storage by saving and loading clubs, events, and registrations from text/CSV files. Planned the system using UML class diagrams and screen designs.

EXPERIENCE

Artificial Intelligence & Machine Learning Fellowship May 2026 - June 2026

Mila Quebec AI Research Institute

- Participated in the AI4Good Lab machine learning bootcamp, gaining exposure to machine learning fundamentals including neural networks, reinforcement learning, ethical AI, and practical data processing.

Digital Operations Lab Technician August 2026 - Present

Ville de Vaudreuil-Dorion

- Deliver technical training and workshops in programming, robotics, and 3D modeling software, while troubleshooting hardware/software issues, maintaining lab equipment, and developing instructional documentation.

Hackathon Organizer & Front-End Developer January 2026 - April 2026

JACHacks

- Organized a 200+ participant hackathon and built and deployed the front-end website for [JACHacks](#) using JavaScript.

AWARDS

Spärck Futur.e Numérique Scholarship for Women in Tech November 2024

Business Development Bank of Canada and National Bank of Canada

TECHNICAL SKILLS

- **Languages:** Python, C#, Java, C++, JavaScript, TypeScript, SQL, Kotlin, HTML, CSS, Bash, jQuery, PowerShell
- **Tools & Technologies:** GitHub, Azure, AWS, Docker, GitHub Actions, CI/CD, VS, VS Code, React, Next.js, Node.js, SQL Server, MySQL, MongoDB, Postman, Jetpack Compose, Android Studio, ASP.NET, Firebase, Supabase, WPF
- **Skills & Methodologies:** Problem-solving & algorithmic thinking, OOP, SDLC, Agile/ Scrum, Full-Stack Development, RESTful API Design, AI/LLM Integration, Authentication & Authorization, Automated Tests, Database Design, Debugging & Testing, Version Control, Cloud Computing, Technical Documentation, Networking, TDD
